CHALKIE

The smarter way to plan lessons ✨

What is Chalkie?

Chalkie is an AI-powered lesson planning assistant that helps teachers create curriculum-aligned lessons, activities and worksheets in minutes rather than hours.

Why Chalkie?

⏱️ Speed up teachers

Teachers can generate entire lessons in under 5 minutes. That's hours saved every week, reducing planning time and freeing teachers to focus on delivery.

📚 Ensure curriculum alignment

Chalkie builds individual lessons or lesson series/units that progress logically and align to curriculum expectations. Great for departments looking to sharpen long-term planning.

🪶 Lighten teacher workload

Reduce out-of-hours work and Sunday night stress. Teachers can use Chalkie to create new lessons or adapt existing ones with ease — promoting well-being, increasing retention and reducing burnout.

📈 Raise consistency & quality

Helps NQTs and non-specialists deliver high-quality lessons in any subject. Great for supply staff too. Ensure all lessons are aligned to your curriculum's standards

🚀 Boost student engagement and outcomes

Chalkie enables all teachers to produce great-looking lessons filled with engaging activities and content to keep students focused on learning.

What teachers say...

> All the staff are absolutely loving it! It has saved them so much time and they are using it consistently within their teaching. It's particularly good at adapting content for different age groups.
>
> **Callum Woolman**
> St Catherine of Siena Primary School

> Chalkie AI is a fantastic tool for teachers. It's super easy to use and saves loads of time. With its modern features and constant improvements, it's a clear step ahead of other apps in this space.
